Summary

Software Engineering student with strong fundamentals in **Java, Python, OOP, Data Structures, and SDLC**. Experienced in building scalable backend systems and web-integrated AI applications. Skilled in full lifecycle software development, collaborating in agile teams, and delivering measurable improvements. Interested in **fintech and digital payments systems** and secure, production-ready engineering.

Work Experience

Python Developer Intern
AICTE (Edunet Foundation)

Oct 2024 – Nov 2024
Remote

- Developed **Scrapetron**, an automated web-scraping tool using Python and BeautifulSoup to extract data from dynamic websites.
- Implemented robust error handling and data serialization to export scraped content into structured JSON/CSV formats for downstream analysis.
- Optimized parsing logic to handle large datasets, improving data extraction speed by **20%** compared to sequential requests.

Open Source Contributor
GirlScript Summer of Code (GSSoC) Extended

Oct 2024 – Nov 2024
Remote

- Contributed to the *Hack-Web3Conf* repository, resolving 4 critical bugs related to responsive UI components and navigation.
- Merged 5+ PRs involving code refactors and documentation updates; collaborated with maintainers to prepare the platform for deployment.

Technical Skills

Languages: Java, Python, SQL, C++
Web: HTML, CSS, JavaScript, Responsive Design
Other: OOP, DSA, Agile, Excel, PowerPoint

Frameworks & AI: LangChain, Pinecone, Flask, Llama 3
Tools: Git, GitHub, MongoDB, IntelliJ, VS Code

Projects

MedGen

Python, LangChain, Pinecone, OpenAI API

- Built a medical chatbot using **RAG (Retrieval-Augmented Generation)** to deliver context-aware responses and reduce hallucination.
- Integrated Pinecone for vector similarity search and LangChain for orchestration; deployed an interactive interface.

MentalHealthGen

Python, Llama 3, NLP, Gradio

- Built an AI assistant designed to provide supportive, empathetic mental-health responses while enforcing safety and responsible AI practices.
- Used prompt-engineering and fine-tuned models to maintain context, emotional tone, and safe boundaries.
- Designed a clean Gradio UI to ensure accessibility and supportive user experience.

Achievements

- **Smart India Hackathon (SIH) 2024:** Selected for internal rounds (Legal Bot).
- **DSA Proficiency:** Solved **190+** problems on LeetCode; contest rating **1550+** (Top 30%).
- **Competitive Programming:** Codeforces rating **1010**.
- **Top Contributor:** Recognized for active contributions during GSSoC Extended 2024.

Education

Galgotias University, Noida, UP
2023 – Present
CGPA: 7.7

B.Tech in Computer Science & Engineering
