

Manas Dubey

Software Engineer — iOS Developer — Apple Swift Student Challenge 2026 Winner (Top 350 Worldwide)

manasdubey2709@gmail.com — +91 9821910281 — [linkedin.com/in/manas-dubey-415385296](https://www.linkedin.com/in/manas-dubey-415385296)

github.com/vikingmanas — leetcode.com/u/ManasDu

Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms (**1605 LeetCode rating, 600+ problems solved**), backend development, and full-stack engineering. Proven track record shipping production software end-to-end, from sprint leadership and API design to deployment and testing. Apple Swift Student Challenge 2026 Winner (Top 350 Worldwide) for MoleVerse, an independently designed and published native iOS application.

Education

Galgotias University

2023 – Present

Bachelor of Technology (B.Tech), Computer Science Engineering

CGPA: **7.88/10**

ISC (Class XII)

2022

Percentage: 75%

ICSE (Class X)

2020

Percentage: 89%

Experience

iOS Application Development Intern

May 2026 – June 2026

Infosys Mysore Campus

github.com/vikingmanas/LoanManagementSystem

- Developed key modules of an enterprise-grade Loan Management System, including borrower onboarding, loan application, approval-workflow, and administrative features.
- Led Agile ceremonies for a **10-member development team**, improving sprint visibility and consistently meeting delivery targets through effective Jira management.
- Implemented OTP authentication using Supabase Auth and automated email notifications using Nodemailer, reducing login friction for users.
- Managed **50+ sprint tasks** and collaborated across the software development life cycle (SDLC) to ensure timely and bug-free feature delivery.

Projects

MedGen – AI Healthcare Assistant (RAG) — *Python, Flask, LangChain, Pinecone, Docker*

github.com/vikingmanas/MedGen

- Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain, OpenAI GPT, and HuggingFace embeddings to answer medical queries grounded in a curated knowledge base.
- Designed a Pinecone vector store for semantic retrieval, deployed via Gunicorn with Docker Compose, and validated with a pytest suite covering the API and retrieval layer.

MoleVerse – 3D Chemical Visualization for iOS — *SwiftUI, SceneKit*

apps.apple.com/in/app/moleverse/id6780773163 — github.com/vikingmanas/MoleVerse

- Developed and published a native iOS application for interactive 3D molecular visualization, integrating a periodic table, molecular info panels, and nuclear physics simulations.
- Published on the Apple App Store and selected as an **Apple Swift Student Challenge 2026 Winner (Top 350 Worldwide)**.

Technical Skills

Languages: Java, Python, JavaScript, Swift, SQL, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Backend & AI/ML: Flask, REST APIs, LangChain, OpenAI API, Pinecone, TensorFlow, Supabase

Tools & Practices: Git, GitHub, Docker, pytest, Jira, Postman, Agile/Scrum

iOS Development: SwiftUI, UIKit, SceneKit, CoreData, CoreML

Achievements & Open Source

- **Apple Swift Student Challenge 2026 Winner (Top 350 Worldwide)** for developing and publishing MoleVerse on the Apple App Store.
- **Competitive Programming:** Solved **600+ DSA problems**; maintained a **LeetCode Rating of 1605** through consistent contest participation.
- **Open Source Contributor (GSSoC'24):** Ranked **433 out of 50,000+** globally through consistent code contributions and issue resolutions during GirlScript Summer of Code.
- **Smart India Hackathon Finalist 2024:** Engineered LawBot, an AI-powered legal assistance platform using Python and machine learning to automate preliminary research.
